Work Experience

Crafted Campus **September 2025 - Present**

Web Developer Internship

- Developed and maintained dynamic and responsive websites using **WordPress** and **React.js**.
- Built reusable React components and managed state efficiently using **React Hooks** and **Context API**.
- Integrated RESTful APIs in React applications to fetch and display real-time data.
- Implemented routing and navigation using **React Router** for seamless user experience.
- Customized WordPress themes and plugins to align with client requirements and improve functionality.
- Collaborated with designers and backend developers to deliver interactive, SEO-optimized web pages.

Projects

MERN Stack

Food Delivery Website

- Developed a full-stack food delivery website using HTML, CSS, React, Node.js, Express, and MongoDB, featuring dynamic product filtering, cart functionality, and secure Stripe payment integration.
- Implemented user authentication with JWT, created RESTful APIs for managing users, orders, and food items, and used middleware to protect routes and ensure secure access.
- Built an admin panel for adding, listing, and deleting food items, as well as tracking delivery status, enabling efficient backend management and real-time order monitoring.

MERN Stack

Ecommerce Website

- Developed a full-stack e-commerce website using the MERN stack, enabling users to browse products, add items to a shopping cart, and complete secure checkout processes.
- Implemented comprehensive user authentication and authorization features, ensuring secure access to personal data and account management.
- Integrated advanced product filtering options to enhance user experience and facilitate easy navigation.
